Watch our First Video Blog!

We're thrilled to announce that the CHAMP Blog will now be featuring video posts from home care professionals and stakeholders. Our first post is from **Mary St. Pierre, Vice President of Regulatory Affairs at the National Association for Homecare and Hospice**. Hear Mary discuss how you can help to reduce avoidable hospitalizations. [Click here](#) to watch her video.

Try Out this Tool

The Hospitalization Risk Assessment is a screening tool that is effective in identifying home care patients that are at risk for hospitalization. The tool has been revised to correlate with **OASIS-C** and was prepared by the West Virginia Medical Institute, the Quality Improvement Organization supporting the Home Health Quality Improvement Campaign.

To access the tool, [click here](#).

Did you know...

Older people with four or more chronic conditions are 99 times more likely to be hospitalized for avoidable problems than those without these conditions.

Want to learn more? Read CHAMP's [Care Coordination brief](#). This brief reviews evidence-based ways to improve care coordination and effective ways to include care management interventions with older patients.

If you're a registered nurse you can also earn continuing education hours by reading the brief. [Click here](#) to learn more.

CHAMP (Collaboration for Homecare Advances in Management and Practice) is based at the Center for Home Care Policy & Research at the Visiting Nurse Service of New York and is funded in part with generous support by The Atlantic Philanthropies and The John A. Hartford Foundation.
