

## **Geriatric Medication Management Course Objectives by Unit**

### **Unit 1: Current Medication Management Practices**

- Describe the impact of medication-related problems in older home care patients
- Describe your team's current medication management practice

### **Unit 2: Medication Reconciliation**

- Define Medication Reconciliation and explain its importance in medication management
- Describe the 3-step process for conducting a medication reconciliation.
- Identify how to improve your team's medication reconciliation practice using the tools and strategies provided in this unit.

### **Unit 3: Communicating Effectively with Physicians**

- Explain which *important medication-related problems* you should be communicating to the patient's physician.
- Define the Situation-Background-Assessment-Recommendation (SBAR) technique
- Identify how to use the SBAR technique to effectively communicate medication-related issues to physicians.

### **Unit 4: Measuring Improvement**

- Re-measure your clinical team's medication management performance.
